

PREDICTIVE PHENOMENA IN DISTRIBUTED SENSOR NETWORKS

A THESIS SUBMITTED TO THE GRADUATE DIVISION OF THE
UNIVERSITY OF HAWAII AT MĀNOA IN PARTIAL FULFILLMENT
OF THE REQUIREMENTS FOR THE DEGREE OF

DOCTOR OF PHILOSOPHY

IN

COMPUTER SCIENCE

DECEMBER 2019

By

Anthony J. Christe

Thesis Committee:

Philip Johnson, Chairperson

Andy Bumatai

Frank DeLima

Joseph B. Bogus

Keywords: theses, dissertations, graduating, misery

To myself,
Perry H. Disdainful,
the only person worthy of my company.

ACKNOWLEDGMENTS

I want to “thank” my committee, without whose ridiculous demands, I would have graduated so, so, very much faster.

ABSTRACT

The abstract goes here.

CHAPTER 1

INTRODUCTION

This is the introduction.

Here is a picture in figure 1.1.

Did the query results answer your question?
☐ Yes ☒ Partially ☐ No ☐ Undecided

Figure 1.1: An example of included Encapsulated PostScript (EPS).

In this modern age, you may find that you wish to include URLs or pathnames which both tend to be long and hard for TeX to deal with because it doesn't know where to insert linebreaks. The “`url`” package (loaded in the main `uhtest.tex` file) allows one to deal with these URLs. For example:

Here is an URL which cannot be broken, leading to terrible output `<http://www.hotwired.com/webmonkey/98/`

Using the package we get the much nicer `<http://www.hotwired.com/webmonkey/98/16/index2a.html>` which LaTeX can handle just fine. Even better, the parameter to `\url` can have spaces inserted anywhere so you can make the LaTeX source lines in your text editor wrap nicely.

A few notes. It is recommended that you enclose your URLs in “`<>`” to ensure that any punctuation around the URL won't be confused as part of the URL. You can use URLs in your bibliography too (see the `uhtest.bib` file for an example). Finally, if you need to use a tilde in your URL then things are a little trickier. One way to do it is like this: `<http://www.dartmouth.edu/~jonh/ff-cache/1.html>`. The `\url` style uses math mode internally, so we break the URL into two pieces, and stick a tilde from math mode inbetween the two parts.

CHAPTER 2

RELATED WORK

Here is where you discuss the related work. Use BibTex to reference related work.

CHAPTER 3

DESIGN

Here is where you discuss your design of your evaluation.

CHAPTER 4

RESULTS

Here is where you discuss the results from your evaluation.

CHAPTER 5

CONCLUSIONS

Here is where you discuss your conclusions and future directions.

APPENDIX A

SOME ANCILLARY STUFF

Ancillary material should be put in appendices, which appear before the bibliography.

APPENDIX B

MORE ANCILLARY STUFF

Subsequent chapters are labeled with letters of the alphabet.
